

Full Stack Engineer with experience in building scalable web applications using React.js, Next.js, TypeScript, Nest.js, and ASP.NET Core Web API. Skilled in designing RESTful APIs, database architecture, authentication systems, and cloud deployments using PostgreSQL, AWS, Docker, and CI/CD pipelines. Experienced in developing SaaS, maintenance management, and logistics platforms with a focus on performance, scalability, and maintainability.

WORK EXPERIENCE

Full Stack developer

iPlexSoft

Karachi

01/2024 – Present

- Developed scalable, high-performance applications using React.js, Next.js, and Nest.js for both frontend and backend.
- Designed intuitive interfaces to enhance user experience and engagement.
- Optimized backend logic, managed APIs, and integrated PostgreSQL and MongoDB for efficient data handling.
- Applied DevOps practices with Docker, CI/CD, and AWS to streamline deployments.
- Collaborated with cross-functional teams to deliver innovative solutions and ensure timely project completion.

EDUCATION

BS - Computer Science (3.8 GPA)

University of Peshawar

Peshwar, pakistan

08/2020 – 12/2024

- Graduated with a strong academic record, achieving a GPA of 3.8. Coursework covered software engineering, data structures, algorithms, database systems, and web development.

SKILLS

Full Stack Developer

JavaScript

React js

Next.js

Redux / Zustand

Typescript

Git

Firebase

Tailwind css

MongoDB

PostgreSql

Node.js

Nest js

DevOps

AWS

CI/CD

ASP.NET Core Web API

REST API Development

Nginx

PROJECTS

Smart Logistics

09/2025 – Ongoing

Riyadh, Saudi arabia

A comprehensive logistics solution designed for managing goods transportation in Saudi Arabia, focusing on streamlining operations for truckers and various roles such as drivers, customers, corporate clients, company managers, brokers, and super admins. The platform enhances efficiency through multi-role management and real-time tracking capabilities.

Technologies Used:

Frontend: Next.js, Zustand, Shadcn, Tailwind CSS

Backend: Nest.js, Prisma, PostgreSQL

Third-party Integrations: PayTabs (Payment Gateway), Msegat (SMS Gateway)

For more details, visit: <https://slt.sa>

Trenzym – Maintenance Management System (SaaS)

07/2024 – 05/2025

Trenzym is a cloud-based maintenance management system designed to streamline ticketing processes within companies. It allows users to report issues and manage various roles such as company admins, managers, agents, and regular users. The system ensures efficient issue resolution and role-based access.

Technologies Used:

Frontend: Next.js, Material UI, Tailwind CSS

Backend: Node.js, Redux Toolkit

Additional Tools: Nodemailer for email notifications, firebase

For more details, visit: <https://mms-psi.vercel.app/login>

Artabia – Marketplace for Artists

01/2024 – 02/2025

Riyadh, Saudi Arabia

Artabia is an online marketplace designed for artists to upload and showcase their artwork, enabling customers to browse, purchase, and pay for art securely. The platform connects artists and art enthusiasts, providing a seamless and user-friendly experience.

Technologies Used:

Frontend: Next.js, Tailwind CSS, Shadcn

For more details, visit: <https://artabiasa.com/?lang=en>

PaperEase – Automatic Question Paper Generator for BS Program

02/2023 – 01/2024

peshawar, pakistan

This system allows administrators and teachers to register and add questions (MCQs and long questions) for various BS programs, semesters, and subjects across multiple colleges. Teachers can generate a question paper with just a click, ensuring ease of use and security. The system assigns subjects to teachers by the admin, ensuring that each teacher only has access to their designated subjects.

Technologies Used:

Frontend: React.js, Material UI, Tailwind CSS, Redux

Backend: Express.js, Mongoose, MongoDB

Authentication: JWT-Auth
